

Embedded Applet for OKI

The uniFLOW Embedded Applet for OKI provides a device-integrated solution enabling device locking, job release from a secure print queue, print, copy, fax and scan accounting, and integration with the native scan to myself. Managed by uniFLOW, OKI multi-functional devices are easily integrated within your print fleet.

One driver for all – the uniFLOW Universal Driver

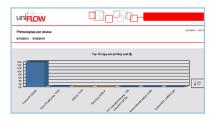

For submitting jobs to OKI devices users are provided with one single driver – the uniFLOW Universal Driver. Its unique technology allows users to choose any network printer from which to release a job as print jobs will follow the user from device to device, regardless of model or manufacturer. The uniFLOW Universal Driver ensures correct output as requested which reduces user dissatisfaction with the printing process and saves costs by cutting waste.

Release to any device

All print jobs are stored in a user's personal secure queue until they are ready to release them at the printer of their choice. This can be any networked printer with the uniFLOW embedded applet installed. Users can select which of their print jobs to release from a list displayed directly on the device screen or from the uniFLOW app running on their smartphone or tablet.

Cost savings, accounting and reporting

Any secure print jobs that have not been collected from the OKI device within a predefined time are automatically deleted rather than sitting in a printer output tray. uniFLOW allows organizations to monitor savings made through improved printing practices e.g. deleting secure print jobs. With this information, better printing rules can be established to manage an entire device fleet or to create new rules and routing workflows that will decrease and optimize printing within the organization.

Multi-level cost center selection

uniFLOW allows organizations to assign costs to a multi-level cost center to allow chargeback to the appropriate customer or project code. Users can simply select which cost center to charge the job to on the screen displayed on the device control panel.

Native scanning

Scanning documents is an important part of users' daily work. Documents can easily be scanned to yourself with only a few clicks after logging on at the device. Within seconds the scans become available at the user's desk for further editing or distribution.

Immediate benefits

Increase document security

To prevent unauthorized use of the devices and to keep valuable and confidential information safe, uniFLOW requires users to identify themselves at a device. This keeps confidential documents out of the wrong hands.

Improve employee productivity

All print jobs, regardless of how they are submitted to uniFLOW, appear in the user's personal secure print queue and can be released from any device, regardless of model or manufacturer i.e. users can print securely using any connected device.

Control and reduce costs

Using the built-in reporting system, organizations can track and assess printing usage, allowing internal costs to be charged back correctly and current usage audited.

Help save the environment

uniFLOW can provide the analysis to help implement an environmental printing strategy, saving valuable trees and improving environmental performance.

Technical data

Core functionality

Device locking	\odot
Print accounting ¹	\odot
Copy accounting	\odot
Scan accounting	\odot
Fax accounting	\odot
Single-level cost center selection	\odot
Multi-level cost center selection	\odot

Device authentication

PIN	\odot
Username/ password	\odot
Job code	\odot
Card login (USB connection) via	
MiCard V3 Multi	\otimes
MiCard V2 HID/Hitag	\otimes
MiCard PLUS/PLUS-2 V2	\odot
MiCard MultiTech4-P/-PI/-P LEGIC	\odot
Anonymous login	\otimes
Card registration on device	\bigcirc
Customizable login screen	\otimes
Device function restriction based on user login	\otimes

Secure print job submission

Submit via uniFLOW Universal Driver	\odot
Driverless printing from OS-X [®] using AirPrint [®]	\bigcirc
Submit via email/ web browser	\odot
Submit via native uniFLOW app	\odot
Submit via Apple AirPrint®	\odot
Submit via Google Cloud Print™	\odot

Secure print release

Automatic job release after authentication	\odot
Individual job selection/ deletion on device	\bigcirc
Thumbnail preview	\otimes
Change finishing options before release ²	\odot
Print shared jobs from archive	\otimes

Native device scanning

Scan to myself	\odot
Scan to folder	\otimes
Scan to mail	\otimes

Scanning and process automation

Personalized scan workflows	\otimes
Advanced document processing	\otimes
Scan to cloud-based destinations	\otimes
Scan to DMS/ECM systems	\otimes
Scan to CSI-based destinations	\otimes

 \bigcirc = Available \bigotimes = N/A

1 Spool file accounting via Secure Output Printer 2 Only available with a uniFLOW CGS license

Supported devices

Devices supported by OKI Smart Extendable Platform version 1 (sXP1)

- MB760/770, ES7170 MFP series
- MC760/770/780, ES7470/7480 MFP series
- ES9460/9470 MFP series
- ES9455/9465/9475 series

Devices supported by OKI Smart Extendable Platform version 2 (sXP2)

- C542, ES5442 series
- MB492/562, ES4192/5162 series
- MC573, ES5473 MFP series
- MC853/873, ES8453/8473 series
